Subject: NCI Bid Board Posting – Preventative Maintenance

The CCR's Center for Immuno-oncology (CIO) explores fundamental questions of cancer immunotherapy through rigorous preclinical studies and translates these findings into clinical trials with the goal of developing novel therapies for a spectrum of cancers.

CCR's long history of excellence in immunology has contributed to advances in immunotherapies now widely used to treat many patients who have cancer. The CIO acts as a hub for CCR's many immuno-oncology efforts to further promote and support these efforts and build on the existing expertise, serving as a nexus for multidisciplinary and collaborative efforts among investigators in multiple laboratories, branches and programs across CCR, NCI, and NIH, as well as with investigators in the academic community and the private sector.

The primary objective of this purchase is to maintain and provide preventive maintenance for INCUCYTE S3 SW/SVC WARRANTY UNDER (Serial# IC52104 and POP of 062023-061924) . All maintenance services shall be performed on-site in accordance with the manufacturer's standard commercial maintenance practices.

The National Cancer Institute plans to procure a preventive maintenance from Sartorius Corporation to perform this work. This is not a request for competitive quotation. However, if any interested party believes it can meet the attached requirements, it may submit a statement of capabilities. The capability statement must be in writing and must contain information and material in sufficient detail to allow NCI to determine is the party can fully meet this requirement. The capability statement must be received in the contracting office by 11:30 AM on Aug 4, 2024 ET. A determination by the Government not to compete this requirement based upon responses to this notice is solely within the discretion of the Government. Information received will be considered solely for the purpose of determining whether to conduct a competitive procurement.

Sole Source Justification:

The Incucyte S3 can be operated only by Sartorius-trained qualified field service engineer and technicians who are adept at operating Sartorius' proprietary machines and associated proprietary software. The software requires periodical update, which are also provided only by the Sartorius. There are no other companies that can provide the same service because the Incucyte S3 and related proprietary software are unavailable to alternative vendors, and there are no alternative vendors that can provide the qualified field service engineers specific to the Incucyte S3.
