WHERE DO I LEARN MORE?

For more information about CUSP2CT and its funded programs, please visit

<https://www.cancer.gov/about-nci/organization/cche/community-outreach/cusp2ct>.

OVERVIEW

The Connecting Underrepresented Populations to Clinical Trials (CUSP2CT) program will implement and evaluate multilevel and culturally tailored outreach and education interventions with the primary goal of increasing referral and, ultimately, accrual of underrepresented racial/ethnic minority populations to NCI-supported clinical trials (National Clinical Trials Network, NCI Community Oncology Research Program, and Experimental Therapeutics Clinical Trials Network). These programs' target population(s) will include individuals from underrepresented racial/ethnic minority populations and will address cancer health disparities through a network of local multidisciplinary and integrated partners.

Without adequate representation, especially in therapeutic trials, cancer disparities are likely to increase as racial/ethnic minority populations may not be able to fully benefit from cutting-edge treatments and the promises of precision medicine.

FUNDING OPPORTUNITIES

CUSP2CT comprises two funding opportunities; however, these are not active funding opportunities:

- » Data, Evaluation and Coordinating Center for: A Multilevel Approach to Connecting Underrepresented Populations to Clinical Trials (CUSP2CT) (U24 Clinical Trial Not Allowed) <https://grants.nih.gov/grants/guide/rfa-files/RFA-CA-22-014.html>
- » A Multilevel Approach to Connecting Underrepresented Populations to Clinical Trials (CUSP2CT; U01 Clinical Trial Optional) <https://grants.nih.gov/grants/guide/rfa-files/RFA-CA-21-063.html>
